
Manner: UNDETERMINED

Deaths are certified as undetermined (or unclassified) manner of death when available information is insufficient to classify the death into one of the specific manners of natural or unnatural death. Information concerning the circumstances may be lacking because of the absence of background information or witnesses, or because of a lengthy delay between death and discovery of the body. If an extensive investigation and autopsy cannot clarify the circumstances, the death is placed in this category. Within King County, there were 63 deaths with manner undetermined, accounting for 4% (63/1578) of the Medical Examiner death investigations for the calendar year 2001. Drugs caused twenty-one (33%) of the 63 deaths of undetermined manner. For a more detailed review of drug-caused deaths in 2001, see also the discussion in the section on Drugs and Poisons on pages 81 & 82.
